

Description

Origin : Papaic Soy Peptone is obtained from defatted soybean flour, using Identity-Preserved (IP) raw materials as it pertains to Genetically Modified Organisms (GMO). The digestive enzyme papain is not concerned by GMO issues.

Context : this peptone is classified animal free, GMO free (according to the European Directive 2001/18/CE) but can not be considered allergen-free due to the presence of soy proteins (Annex IIIa of the EU directive 2003/89/EC, updated with 2006/142/EC). This reference is certified **Kosher DE**. An identical **Kosher Pareve** certified reference is available under code **A163700**.

Application : produced for principle applications in the fermentation industry in terms of granulometry and color, the peptone leads to the rapid and luxuriant growth of many microorganisms, including yeasts and molds.

Sanitary Attestation

This plant peptone is classified animal-free by SOLABIA S.A.S. Based on the manufacturing protocol, we attest that no animal raw materials are prescribed for use in the production this product nor are any of the raw materials derived from animal products. Also, to the best of our knowledge, the product contains no genetically modified organisms as defined by current legislation for labelling (absence = less than 0.9%).

OBSERVED MICROBIAL GROWTH POTENTIAL :

Inoculum 10^6 cfu / mL

Growth medium: 1 % peptone + 0.5 % NaCl

BDCC = Solabia internal strain collection

Inoculum 10^4 cfu/mL

Culture medium : 3% peptone + 0.25% glucose

This peptone demonstrates excellent growth of a wide variety of microorganisms and can be used in various applications as an all-purpose substrate. It can be recommended for either a replacement for bovine substrates or as a stand-alone peptone. Results may differ depending on individual laboratory conditions and for other genera, species and strains.
