

Description

- Origin :** Potato Peptone is obtained by enzymatic hydrolysis of potato protein.
- Context :** this peptone is classified animal free and is unconcerned by GMO issues (European Directive 2001/18/CE). It is, to the best of our knowledge, non allergenic and not subject to mandatory declaration according to Annex IIIa of the EU directive 2003/89/EC, updated with 2006/142/EC). This reference is certified **Kosher DE**. An identical **Kosher Pareve & Halal** certified product is available under separate reference A243100.
- Application :** in light of its exceptional stability and clarity in solution, Potato Peptone may be particularly well suited for industrial fermentation growth media, cell culture supplementation and for diagnostic applications in animal-free culture media.

This plant peptone is classified animal-free by SOLABIA S.A.S. Based on the manufacturing protocol, we attest that no animal raw materials are prescribed for use in the production this product nor are any of the raw materials derived from animal products. Also, to the best of our knowledge, the product contains no genetically modified organisms as defined by current legislation for labelling (absence = less than 0.9%).

Standard packaging

25 kg carton ; other formats inquire. Delivered with Certificate of Analysis, Certificate of Origin. Separate non-Animal, GMO and allergen statements available upon request.

OBSERVED MICROBIAL GROWTH POTENTIAL :

Inoculum 10^6 cfu / mL
Growth medium: 3 % peptone + 0.25 % glucose

Inoculum 10^2 cfu/mL
Culture medium : 1% peptone + 0.5% NaCl

Laboratory tests demonstrate excellent growth of a wide variety of microorganisms, with no inhibition. Used in diagnostics, it also favors pigmentation in *Pseudomonas* spp. (pyocyanins). It can be recommended for either a replacement for bovine substrates or as a stand-alone peptone. Results may differ depending on individual laboratory conditions and for other genera, species and strains.
