RE: UPDATE ON VICTORIAN COVID 19 RESTRICTIONS

Dear Valued Clients,

This week the Victorian Government provided details of the new Stage 4 COVID-19 restrictions for metropolitan Melbourne. These restrictions come into effect at 11:59 pm today (Wednesday 5 August) and are expected to stay in place for six weeks. This is difficult news and our thoughts are with everyone facing this challenging time.

I am writing to confirm that Cell Biosciences is open for business under the "COVID-19 Safe Plan Guidelines" and we are complying with all government regulations. Cell Biosciences and its associated service providers will remain open and operate under the "Permitted Industry" classification.

Cell Biosciences continues to maintain stock in Australia, and our overseas suppliers continue to manufacture as normal. However, we have been experiencing delays in freight transportation, both Internationally and Domestically.

I strongly recommend that you review your requirements for the immediate future and ensure you order with at least 4-week lead-time or increase the amount of stock you are holding in your laboratory.

We do not envisage any break in supply, however during this unprecedented time, we continue to plan for any scenario.

If you require further information, please do not hesitate to contact me on 0488 090 888.

Your faithfully,
Cell Biosciences Pty Ltd

Joe Cardamone
General Manager
